

20256.TXT

Make sure that equipment is available for cooling the vessels, to prevent the danger of overpressure and overheating in the event of fire in the vicinity. Refer to the other sections of this data sheet for information relating to health and environmental risks.

Safety data sheet: DESIGNER'S GOUACHE 20256 - 2 -
 Printed on 3.09.2000 Revision n. 2 Dated 3.09.2000

8. Exposure controls/personal protection.

Follow the good industrial hygiene practices adopting suitable individual protective measures such as gloves and overalls. Do not eat or smoke while handling the product. Wash hands before eating and at the end of the work shift. Periodic health controls are recommended at the discretion of the doctor.

9. Physical and chemical properties

Appearance	Paste
Colour	Violet red
Odour	Arabic gum
Flash point	> 56ø
Solubility	Insoluble, dilute with water
Viscosity	20000 cps
Specific gravity.....	20ø 1,600 kg/l 0,2

10. Stability and reactivity

The product is stable in normal conditions of use and storage. In the event of thermal decomposition or fire, vapours potentially dangerous to health may be released.

11. Toxicological information

No episodes of damage to health following exposure to the product have been reported. In any case it is advisable to operate according to good industrial hygiene practices.

12. Ecological information

Use in accordance with good working practices, avoiding dispersion of the product in the environment. In sections n° 10 and 16, data and judgements expressed on aquatic toxicity, mobility, persistence, and biodegradability, and bioaccumulation potential are reported.

13. Disposal considerations

To discharge observing the local laws in force.

58610.TXT

5. Fire-fighting measures

Closed containers exposed to the heat of a fire may lead to pressure rise and explode. For information on environmental and health risks, protection

Safety data sheet: AUXILIARY PRODUCTS 58610 - 2 -
Printed on 3.09.2000 Revision n. 2 Dated 3.17.1999

of the respiratory airways, ventilation and individual protective measures refer to the other sections of this sheet. Extinguishing measures: CO₂, foam, AFFF, chemical powder for flammable liquids. Water may not be effective to extinguish the fire, nevertheless it should be used to cool the containers exposed to flames and prevent fires and explosions. For leakage and spillage that have not caught fire, nebulized water may be used to disperse the flammable vapours and protect the people involved in stopping the leakage. Equipment: wear equipment complete with helmet and face shield and protection of the neck, self-breathing apparatus at pressure or demand, insulative jacket and trousers, with bands around the arms, legs and waist.

6. Accidental release measures

Exclude sources of ignition and ventilate the area. Cover with inert absorbent material. Collect spillages by means of spark-proof equipment. Use water only to remove residuals, so as not to run the risk of enter the sewer. Do not let the product dry. Contaminated clothes must be left to soak in water before washing. In order to choose safety measures and protection equipment, please see the other sections of this sheet. Spillage in waters: remove the liquid from the surface with flame-proof pumps or manual pumps or suitable absorbent material. Resort to sinking and/or dispersion of the product with suitable substances in open waters, if permitted by the law.

7. Handling and storage

Avoid the accumulation of electrostatic charges. Store the containers sealed and in a well-ventilated place. Vapours may ignite with explosion, it is therefore necessary to avoid accumulation keeping the windows and doors open, ensuring cross-ventilation. Without adequate ventilation, the vapours may accumulate at the bottom and ignite at a distance, if triggered off with the risk of flashback. Keep far away from sources of heat, sparks and naked flames. Do not smoke, use matches or lighters. Keep the containers earthed while decanting and wear antistatic boots. Vigorous stirring and flow through the pipings and equipment may cause the formation an accumulation of electrostatic charges due to the low conductivity of the product. In order to avoid the risk of fire outbreak and explosion never use compressed air during movement.

8. Exposure controls/personal protection.

BUTANONE; ETHYL METHYL KETONE;
METHYL ETHYL KETONE

In order to minimize exposure as far as possible, it is strongly recommended to use adequate individual protective measures such as: masks suitable for the product, goggles, gloves and overalls. Do not eat, drink or smoke while handling it. Accurately wash the hands with soap and water before meals and at the end of the work shift.

Safety data sheet: AUXILIARY PRODUCTS 58610 - 3 -

9. Physical and chemical properties

Appearance	Liquid	
Colour	Slightly yellowish	
Odour	Alcool	
Flash point	< 20ø	
Solubility	Alcools	
Specific gravity.....	20ø	0,980 kg/l 0,1

10. Stability and reactivity

The product is stable in normal conditions of use and storage. When heated or in the event of a fire, carbonoxides may be released and vapours which are dangerous to health. The vapours may also form explosive mixtures with the air.

Ethanol reacts violently with strong oxidizing agents.
 Methyleneethyl ketone reacts with light metals such as, aluminium and strong oxidizing agents. It attacks different types of plastic materials.

11. Toxicological information

Slight irritation of the eyes; symptoms may include redness, edema, pain and lacrimation. Other possible effects are: irritation of the upper respiratory tract with nose and throat pain, cough, sneezing; mild irritation of the skin on prolonged or repeated contact with erythema, swelling and itching. Ingestion is not a probable route of exposure, but may cause slight depression of the CNS, with symptoms consisting in: headache, dizziness, somnolence. Ingestion can also cause abdominal pain, with diarrhea and vomiting. No evidence has been reported regarding its carcinogenic, mutagenic and toxic effect on reproduction (teratogenesis).

12. Ecological information

Use in accordance with good working practices, avoiding dispersion of the product in the environment. In sections N. 10 and 16, data and judgements expressed on aquatic toxicity, motility, persistence and biodegradability, and bioaccumulation potential are reported.

13. Disposal considerations

Page 3

58610.TXT

Consider the possibility of burning the product in a suitable incinerator, after adding fuel if necessary. Acid or basic products must always be neutralized before undergoing any treatment, including biological treatment whenever feasible. If the waste is solid, it can be disposed of in a landfill.
