SDS Documents from Sakura of America – Important information

The Hazard Communication Standard (HCS) requires importers to provide Safety Data Sheets (SDSs) (formerly known as Material Safety Data Sheets or MSDSs) to communicate the hazards of hazardous chemical products. As of June 1, 2015, the HCS will require new SDSs to be in a uniform format, and include the section numbers, the headings, and associated information under the new headings.

SDSs that represent <u>non-hazardous chemicals are not covered by the HCS</u>. Paragraph 29 CFR 1910.1200(g)(8) of the standard requires that "the employer shall maintain in the workplace copies of the required SDSs for each hazardous chemical, and shall ensure that they are readily accessible during each work shift to employees when they are in their work area(s)." OSHA does not require nor encourage employers to maintain MSDSs for non-hazardous chemicals. Consequently, an employer is free to discard MSDSs for non-hazardous chemicals.

SDS are only required for materials that are <u>hazardous</u>. Often times, manufacturers are asked for MSDS's for products that do not meet this requirement - <u>manufacturers are under **no** obligation to produce SDS's for non-hazardous materials</u>. OSHA discourages the production of MSDS & SDS for non-hazardous materials.

An "article" means a manufactured item: (1) which is formed to a specific shape or design during manufacture (2) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (3) which does not release, or otherwise result in exposure to, a <u>hazardous chemical</u> under normal conditions of use. <u>Any product which meets the definition of an "article," would be exempt from the requirements of the Standard.</u>

The definition above has been amended to permit the release of "very small quantities, e.g., minute or trace amounts" of a <u>hazardous</u> chemical and still qualify as an article provided that a physical or health risk is not posed to the employees (59 F.R. 6146). In evaluating an article, one must consider the health risk which exposure to that article presents. (The term "risk" as opposed to "hazard" is used here, since the hazard is an inherent property of the chemical and exists no matter the quantity of exposure. To be exempted as an article, exposure must not pose a risk to employee health.)

Note that OSHA cannot make an across-the-board determination of a products' exclusion as an "article." The standard's definition by its very wording imposes the need to make case-by-case evaluations. Consequently, a blanket exemption for specific products cannot be given by OSHA.

The HCS exempts any <u>consumer product</u> or hazardous substance, as those terms are defined in the <u>Consumer Product Safety Act</u> (15 U.S.C. 2051 et seq.) and Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.) respectively, where the employer can show that it is used in the workplace for the purpose intended by the chemical manufacturer or importer of the product, and the use results in a duration and frequency of exposure which is not greater than the range of exposures that could reasonably be experienced by consumers when used for the purpose intended.

According to the first OSHA interpretation listed below, "...clerical workers...**may not** be subject to the requirements of the HCS. Office workers who encounter hazardous chemicals only in isolated instances are not covered by the rule. The Occupational Safety and Health Administration (OSHA) considers most office products (such as pens, pencils, adhesive tape) to be exempt under the provisions of the rule, either as <u>articles</u> or as <u>consumer products</u>.

Page 2 of this memo lists the specific stock numbers which are covered under the attached SDS although not specifically noted on the SDS section 1.. Numbers listed on this 2nd page which are not noted on the SDS are due to packaging variations (i.e. blister cards, sets) but the individual contents of these packaging variations are within the SDS.

All products offered by Sakura of America are considered either a) articles b) office products and/or c) consumer products and are exempted from the requirements of the Standard(s) and do not require SDS (unless otherwise noted)

Nonetheless, some downstream clients may insist on an SDS even when one is not required. In such cases, OSHA has suggested providing a written statement such as "*This product is not considered to be or to contain hazardous chemicals based on evaluations made by our company under the OSHA Hazard Communication Standard*, <u>29 CFR 1910.1200</u>." This gives the requesting party something that they can put in their files and saves the manufacture<u>r</u> from needless work.

SAFETY DATA SHEET

(Required under OSHA's Hazard Communication Standard 29 CFR 1910.1200)

Section 1. Identification	
Manufacturer's Name:	Telephone Number:
Sakura Color Products Corporation	+81 (0)6 - 6910 - 8824 (Japan)
Address:	FAX Number:
1-6-20, Morinomiya Chuo, Chuo-ku, Osaka, 540-8508 Japan	+81 (0)6 - 6910 - 8834 (Japan)
Product Name: PIGMA GRAPHIC 1 PEN 1MM: Black(XSDK1-49), Blue(XSDK1	-36), Red(XSDK1-19), Sepia(XSDK1-117)
Section 2. Hazard(S) identification	
This product is approved by ACMI (The Art & Creative Material	Institute Inc.)
an This product is not considered hazardous in normal use as requ	d carries the "AP" seal of non-toxic approval in US
Section 3. Composition / information on ingredients	
Ethylene glycol (107-21-1), 2-Butoxyethanol (111-76-2), Carbo	n black(1333-86-4), Resin, Pigment, Additive
Section 4. First-Aid measures	
 Inhalation : If he/she has subjective and objective symptom 	ms, move him/her to a place fresh air, and consult a doctor.
 Skin Contact : Wash with soap and water. 	
·Eye Contact : Wash the eyes immediately with large amount	s of running water for over 15 minutes,
	and see a doctor for medical advice.
 Ingestion : If the victim stops breathing, wipe away any result 	emaining material in the mouth and
	clear the airway and administer artificial respiration
Section 5. Fire-fighting measures	
Suitable extinguishing media : In case of fire, use	e water spray, foam or dry chemical powder.
 For safety reasons unsuitable extinguishing media : None 	
Protective equipment : No special measu	ires required
Section 6. Accidental release measure	
Person-related safety precautions : No relevant inform	
·Measures for environmental protection : No relevant inform	
 Measures for cleaning/collecting : The ink is not spilled so that 	t it soaked into the ink reservoir by normal handling
Section 7. Handling and storage	
•Handling : In the case of stuck to the skin, rinse with run	
•Storage : Avoid high temperature, fire, direct rays of the	sun, and a powerful oxidizing agent.
Section 8. Exposure controls / personal protection	
General protective and hygienic measures: Unnecessary in ne	
Breathing equipment : Unnecessary in normal use

SDS Documents from Sakura of America – Important information

The Hazard Communication Standard (HCS) requires importers to provide Safety Data Sheets (SDSs) (formerly known as Material Safety Data Sheets or MSDSs) to communicate the hazards of hazardous chemical products. As of June 1, 2015, the HCS will require new SDSs to be in a uniform format, and include the section numbers, the headings, and associated information under the new headings.

SDSs that represent <u>non-hazardous chemicals are not covered by the HCS</u>. Paragraph 29 CFR 1910.1200(g)(8) of the standard requires that "the employer shall maintain in the workplace copies of the required SDSs for each hazardous chemical, and shall ensure that they are readily accessible during each work shift to employees when they are in their work area(s)." OSHA does not require nor encourage employers to maintain MSDSs for non-hazardous chemicals. Consequently, an employer is free to discard MSDSs for non-hazardous chemicals.

SDS are only required for materials that are <u>hazardous</u>. Often times, manufacturers are asked for MSDS's for products that do not meet this requirement - <u>manufacturers are under **no** obligation to produce SDS's for non-hazardous materials</u>. OSHA discourages the production of MSDS & SDS for non-hazardous materials.

An "article" means a manufactured item: (1) which is formed to a specific shape or design during manufacture (2) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (3) which does not release, or otherwise result in exposure to, a <u>hazardous chemical</u> under normal conditions of use. <u>Any product which meets the definition of an "article," would be exempt from the requirements of the Standard.</u>

The definition above has been amended to permit the release of "very small quantities, e.g., minute or trace amounts" of a <u>hazardous</u> chemical and still qualify as an article provided that a physical or health risk is not posed to the employees (59 F.R. 6146). In evaluating an article, one must consider the health risk which exposure to that article presents. (The term "risk" as opposed to "hazard" is used here, since the hazard is an inherent property of the chemical and exists no matter the quantity of exposure. To be exempted as an article, exposure must not pose a risk to employee health.)

Note that OSHA cannot make an across-the-board determination of a products' exclusion as an "article." The standard's definition by its very wording imposes the need to make case-by-case evaluations. Consequently, a blanket exemption for specific products cannot be given by OSHA.

The HCS exempts any <u>consumer product</u> or hazardous substance, as those terms are defined in the <u>Consumer Product Safety Act</u> (15 U.S.C. 2051 et seq.) and Federal Hazardous Substances Act (15 U.S.C. 1261 et seq.) respectively, where the employer can show that it is used in the workplace for the purpose intended by the chemical manufacturer or importer of the product, and the use results in a duration and frequency of exposure which is not greater than the range of exposures that could reasonably be experienced by consumers when used for the purpose intended.

According to the first OSHA interpretation listed below, "...clerical workers...**may not** be subject to the requirements of the HCS. Office workers who encounter hazardous chemicals only in isolated instances are not covered by the rule. The Occupational Safety and Health Administration (OSHA) considers most office products (such as pens, pencils, adhesive tape) to be exempt under the provisions of the rule, either as <u>articles</u> or as <u>consumer products</u>.

Page 2 of this memo lists the specific stock numbers which are covered under the attached SDS although not specifically noted on the SDS section 1.. Numbers listed on this 2nd page which are not noted on the SDS are due to packaging variations (i.e. blister cards, sets) but the individual contents of these packaging variations are within the SDS.

All products offered by Sakura of America are considered either a) articles b) office products and/or c) consumer products and are exempted from the requirements of the Standard(s) and do not require SDS (unless otherwise noted)

Nonetheless, some downstream clients may insist on an SDS even when one is not required. In such cases, OSHA has suggested providing a written statement such as "*This product is not considered to be or to contain hazardous chemicals based on evaluations made by our company under the OSHA Hazard Communication Standard*, <u>29 CFR 1910.1200</u>." This gives the requesting party something that they can put in their files and saves the manufacture<u>r</u> from needless work.

Section 9. Physical and chemical	properties for Ink
 Boiling point / boiling range 	: about 100 °C
 Flash point 	: No data
 Melting point 	: No data
 Solubility: 	
water solubility	: Soluble (except pigments)
fat solubility (solvent – o	il to be specified) : Insoluble
·Relative density	: 1 < g/cm ³ (at 25°C)
Section 10. Stability and reactivity	
 Conditions to avoided: 	
High temperature, D	irect sunlight, Fire
 Materials to avoided: 	
Strong acid and base	e
 Hazardous decomposition pro 	ducts:
No dangerous decon	nposition products known
Section 11. Toxicological information	on
This product is approved by ACI	MI (The Art & Creative Material Institute, Inc.),
	and carries the "AP" seal of non-toxic approval in USA.
Section 12. Ecological information	
No relevant information found.	
Section 13. Ecological information	
	s or dispose of in accordance with local regulations.
Section 14. Transport information	
•DOT : Not applicable	
 IATA : Not applicable 	
·IMO : Not applicable	
Section 15. Regulatory information	<u>ــــــــــــــــــــــــــــــــــــ</u>
TSCA : The product listed on S	afety Data Sheet is not listed on Toxic Substances Control Act Inventory.
	5
	manufacture this product are listed on TSCA Inventory.
