Article description

FIMO KIDS 8030

Constituents

Binding agent:	Polyvinyl chloride
Special softening agent:	Regulated by the European Standard EN71, part 5. Not classified as hazardous in accordance with the European legislation. Recommended by the CSTEE (Comité Scientifique de Toxicologie, Ecotoxicologie et l'Environnement) European Scientific Committee on Toxicity, Ecotoxicity and Environment
Filler:	Inorganic fillers, e.g. chalk
Colouring agent:	Colour pigments
Packaging ¹	Standard block, half block, large block: PP-film, Blister card: PET with paper sheet
Accessories ¹	Modelling stick: PP, modelling pad: PE

¹ Plastics: PP = polypropylene, PE = polyethylene, PET = polyester - STAEDTLER does not use toxic heavy metal pigments for colouring of plastics

Conformity / Tests

EN71 The product conforms to the European Standard 2009/48/EG 'safety of toys' and therefore bear the CE symbol.
CE Tests are in accordance with testing rules contained in the currently valid European Standard EN 71:
 EN71/1 Mechanical and physical properties
 EN71/3 Specification for migration of certain elements and
 EN71/5 Chemical toys (sets) other than experimental sets.
 To be tested: Oven-hardening modeling clay and packaging. Safety instructions are defined by the standard.

The modelling clays meet the Regulations (EG) No. 1907/2006 (REACH) and No. 1272/2008 (CLP) concerning the Registration, Evaluation, Authorization and Restriction of Chemicals.

ASTM D-4236

FIMO KIDS is tested by ACMI (Art & Creative Material Institute) and conforms to the US-Standard ASTM D-4236. According to the standard, a qualified toxicologist tests the products.

Additional product inspections:

Cured FIMO is resistant to sweat and saliva according to DIN 53160 (Testing by LGA, Germany).
 No emissions during a curing temperature of max. 130°C/266°F and a curing time of 30 min (Tested by an accredited laboratory).

Usage notes

As an optimal curing temperature / curing time is recommended: 110°C (230°F) / 30 min. Please observe the instructions for use.
 The hardening of the modelling clay is based on a gelling process in which the plastic powder is dissolved in the plasticizer by heat.
 FIMO KIDS is ideal for educational purposes in schools and kindergartens as well as for hobby applications.

has been certified to ISO 9001 and ISO 14001 and considered in the selection of raw materials and their processing in the relevant national and international laws to protect the users.

The information contained herein is based on our present state of knowledge and does not provide warranty for any features.
 The suitability of our products on the application intended by the user has to be checked at the user's own risk.
