## SECTION 4 - FIRST AID MEASURES

Description of first aid measures:	
In the event of skin contact:	Wash with water and soap as a precaution.
In the event of eye contact:	Flush eyes with water as a precaution. Get medical attention if eye irritation develops or persists.
In the event of swallowing:	Never give anything by mouth to an unconscious person. Drink plenty of water. Get medical attention if symptoms occur.
In the event of exposure by inhalation:	Remove person to fresh air. If breathing is difficult or if discomfort occurs and persists, obtain medical attention.
Most important symptoms and effects, acute and delayed:	Difficulty breathing. Cough.
Indication of any immediate medical attention and special treatment needed:	Aspiration or inhalation of this product could cause chemical pneumonitis. Treatment is symptomatic and supportive.

## SECTION 5 - FIREFIGHTING MEASURES

Suitable extinguishing media:	Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.
Unsuitable extinguishing media:	None known
Special hazards arising from the substance or mixture :	Avoid dust formation fine dust dispersed in air, in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
Advice for fire fighters:	As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.
Explosion data:	
Sensitivity to mechanical impact:	Not sensitive.
Sensitivity to static discharge:	Static electricity might be sufficient to ignite dust clouds. Possibility of ignition will depend on the minimum ignition energy (MIE) and the type of operations undertaken with the material. MIE values are not provided in this SDS.

## SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures:	Avoid dispersal of dust in the air (i.e., cleaning dust surfaces with compressed air.) Avoid breathing dust. Powder may become slippery when wet. For personal protection see section 8.
Methods and material for containment and clean up:	Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration.  Sweep, vacuum or shovel into suitable containers for disposal. Non-sparking tools should be used. Wash down water is not recommended. Powder may become slippery when wet.
Environmental procedures:	See Section 12 for additional Ecological Information.
Reference to other sections:	Section 8: Personal Protection Section 12: Ecological Information

## SECTION 7 - HANDLING AND STORAGE

Precautions for safe handling:	Handle in accordance with good industrial hygiene and safety practice. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powdered material can build static electricity when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmosphere. Ensure adequate ventilation. In case of insufficient ventilation, wear suitable respiratory equipment if release of airborne dust is expected.
Conditions for safe storage including any incompatibilities:	Store at less than 25°C, in tightly closed containers. Keep out of direct sunlight. Store in dry environment away from heat and sources of ignition, i.e., steam pipes, radiant heaters, hot air vents or welding sparks. Do not store with strong smelling materials. Incompatible products: oxidizing agents, strong acids.
