

# BELLA+CANVAS®

LOS ANGELES

## THE DESTINATION FOR USA MADE

### ECO-FRIENDLY

The BELLA + CANVAS sewing floor is solar-powered and creates almost no landfill waste. Everything we can't turn into a tee is either recycled or re-purposed. Thanks to our solar panels, the LA sunshine generates all the electricity needed to run our facilities. We have electric car charging stations, a comprehensive recycling program, and our local LA dye house uses all non-harmful chemicals. Check out our website for a behind the scenes look at our US operation at [www.bellacanvas.com/responsible-tees](http://www.bellacanvas.com/responsible-tees).

### LOS ANGELES

BELLA+CANVAS supports American jobs by employing 800 people in our Los Angeles facility, including our domestic sewing operation that yields 10 million units per year. American made is something we believe in deeply and we've dedicated immeasurable resources to growing our domestic sewing during the two-plus decades we've been manufacturing tees.

### NO SWEATSHOPS

Kind tees are our kind of tees. BELLA+CANVAS has been manufacturing in a no-sweat-shop, humane, ethical, and sustainable way since day one. Doing things the right way has never been up for debate. Our Platinum W.R.A.P. Certification is just a small indication of how hard we work to make sure our warehouse, sewing and cutting floors are pleasant, productive, comfortable places to work. For more information, please visit [www.bellacanvas.com/wrap-certification](http://www.bellacanvas.com/wrap-certification).

### RETAIL QUALITY

BELLA + CANVAS owns and operates the most technologically advanced cutting facility in the US, which results in the highest quality, consistent, side-seamed tees. Style 3001U (Unisex Jersey Made in the USA Tee) is stocked in 12 colors, for off the shelf USA made blanks. For customers interested in additional USA made styles, the minimum to produce most styles domestically starts at 2,000 units per style/color and is subject to an up-charge. Please reach out to your sales rep for more information.
