USEFUL TIPS

How to clean your brushes after using solvent-based paints

Pébéo offers many different **solvent-base** paint ranges including: Fantasy Prisme, Fantasy Moon, Vitrail and Ceramic.

For all those ranges the cleaning process is the same. The brushes can be cleaned first with **odourless mineral or white spirit**. You can then complete cleaning with water and a mild **soap** for brushes. As a last step, rinse well and wipe out the excess of water with a dry cloth or paper towel.
