

Benefits of Cold Lamination

NO HEAT

NO ELECTRICITY

NO ODOR

NO MESS

NO WAIT

NO SERVICE CONTRACT

WHY COLD LAMINATION?

EASY TO USE

Because cold laminators do not use heat, no lengthy warm up time required. There is no need to adjust the roller tension or thermostat for proper results. It does not require electricity so you can use it anywhere, just turn the handle to operate. Very little maintenance is required compared to hot roll laminators. Material moves much more quickly through a cold laminator.

RESULTS

Wrinkles or bubbles are much less likely when you use a cold laminator. Cold laminators can be used with any flat material. Unlike hot laminators, they will not harm heat sensitive documents or photographs.

SAFER LAMINATING

With a cold laminator the plastic laminate will not melt and stick to the rolls as it can with a hot laminator. No heat means no chance of burns and no potential fire hazard. There is no odor like that given off by hot plastic on a roll laminator.
